

CONTROL UNIT / PCK3 AIRTRONIC

ONE DEVICE FOR AIR HEATER AND AIR CONDITIONING CONTROL

With the PCK3 Airtronic, Eberspächer offers one control unit to operate Airtronic air heater and air conditioning functions in a broad range of vehicles with just a few simple steps. No longer are two separate devices needed.

The PCK3 Airtronic is the perfect solution to combine the Airtronic air heater with an air conditioning system. It makes comprehensive climate control particularly intuitive, fits nicely into the vehicle interior and is easy to install.

ADVANTAGES:

- Simple and fast operation
- Robust and reliable, especially for heavy duty environments
- Broad application in vehicles of all types
- Easy integration
- Stepless heating performance control

ADDITIONAL FEATURES:

- Combination of Airtronic and VAC system
- A/C and Airtronic can be switched on and off by a rocker switch
- Colored lights on rocker switches indicate if A/C or heating is turned on
- Attractive design compliments the vehicle interior
- Interfaces: S+
- Compliant with CE and ECE standards

SEGMENTS:

TECHNICAL DATA:

PCK3		AIRTRONIC	
Operating voltage	V	12	24
Operating voltage range	V	10.5 - 14.5	22.5 - 25.5
Operating/storage temperature	°C	-40 to 70	
Main dimensions L x W	mm	123.2 x 63	
Protection rating		IP20*	
Product code		83.0034.03.0629	83.0034.03.0630

* Mounting position: plug at the bottom up to max. 30° from vertical

PRODUCT OPERATION:

- 01 Heating performance rotary switch
- 02 Airtronic on/off rocker switch
- 03 A/C on/off rocker switch
- 04 Cooling performance rotary switch
